

Whistlebrook is meeting the growing demand for business information availability and quality with a range of packaged software and bespoke business intelligence solutions.

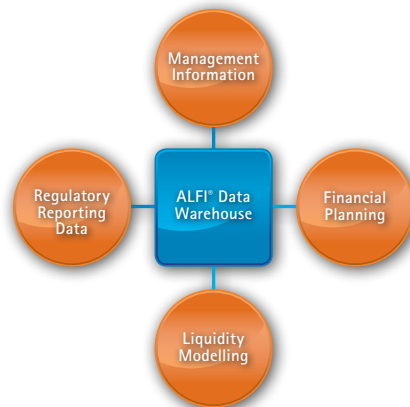

An information management system specialist with an excellent reputation for delivering major IT projects in the business intelligence market, we are helping customers drive down costs and create high levels of business value.

Whistlebrook packaged software solutions

Our range of packaged software solutions provides lower cost and flexible alternatives for managing critical operational and performance data.

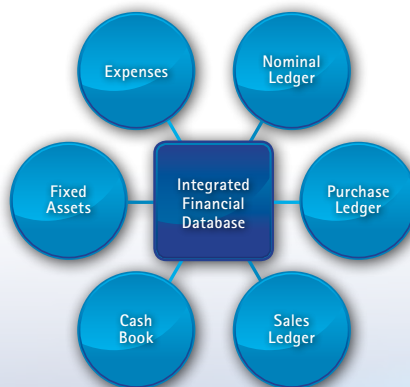

Analytics for Financial Institutions (ALFI® - Business Intelligence)

ALFI® is a customisable business intelligence platform that gives retail banks, building societies, investment banks and other financial institutions a central, interactive solution for collating and analysing vital management information. It integrates with existing systems and can easily be customised and extended to fit exact requirements.

Whistlebrook Financials

Whistlebrook Financials is a flexible accounting solution that provides high levels of functionality at a competitive price. It has a user-friendly, web-based graphical interface and is easy to integrate with other business systems.

Bespoke development

We are extremely well regarded for our business intelligence system knowledge and our ability to deliver high levels of business value. We have built transformational systems for a number of blue-chip customers. Our key drivers in this market are our flexibility and excellence in project management.

C. Hoare and Co. Bank

C. Hoare and Co. Bank is using the ALFI® Liquidity Modelling solution to run test scenarios and demonstrate compliance with the FSA's liquidity modelling requirements.

Coventry Building Society

We implemented the ALFI® Regulatory Reporting Data module to populate regulatory reporting forms to electronically submit daily liquidity reports to the Financial Services Authority. Before this automation, it could take The Coventry as many as five working days to produce a single report.

Skipton Building Society

The Skipton is using ALFI® to provide sophisticated management information for branch activity reporting and credit risk analysis. Processes that took as long as 35 hours are now almost instant.

Norwich and Peterborough Building Society

The ALFI® planning module allows N&P to create and stress test its five year financial plan which it submits regularly to the FSA. The new, integrated BI system provides information and analysis to N&P's Executive Board, Finance and Product Marketing teams.

Monmouthshire Building Society

The Monmouthshire Building Society replaced its core CFAS finance application with Whistlebrook Financials. It streamlined and automated financial processes while providing sophisticated reporting capability and supporting decision making with accurate data.

TNT Express

Through a long-term partnership we have helped TNT Express to build and integrate sophisticated business intelligence systems that have delivered as much as 200% ROI.
